

Appendix M: Gap Analysis Spreadsheets - Finding Sanctuary

(Cross reference to Section 5 of the Report)

This Appendix provides the results of the gap analysis in four separate spreadsheets with tabs for presence, extent and condition.

The High, Moderate and Low refer to the scores obtained from the Confidence Assessments as given in Appendix K.

High	H
Moderate	M
Low	L
No confidence	N

Gap is defined as a site having less than high confidence for one or more features (or less than high confidence for boundaries) therefore any site that has a orange cell will be considered to have a gap.

rMCZ		
The Canyons	rMCZ1
