

## Inner Bank (rMCZ31) Evidence Review

Region	Balanced Seas	
Site Name/number	Inner Bank rMCZ BS31	
ENG Features present and proposed for inclusion within MCZ designation	BSH	<ul style="list-style-type: none"> <li>Moderate energy infralittoral rock</li> <li>Moderate energy circalittoral rock</li> <li>Subtidal coarse sediment</li> <li>Subtidal sand.</li> </ul>
	Habitat FOCI	<ul style="list-style-type: none"> <li>Native Oyster <i>Ostrea edulis</i> beds.</li> </ul>
	Species FOCI	<ul style="list-style-type: none"> <li><i>Ostrea edulis</i>.</li> </ul>
ENG Features present but not proposed for inclusion within MCZ designation	BSH	-
	Habitat FOCI	-
	Species FOCI	-
Non-ENG Features (Geological/geomorphological)		-

### Evidence Summary – data provided by Regional MCZ Projects

Feature	Evidence Summary	Key Sources
Moderate energy infralittoral rock	Polygon data from MESH/UKSeaMap; survey ID: GB001055. No point records, no non-conflicting modelled data.	MESH/UKSeaMap;
Moderate energy circalittoral rock	Polygon data from MESH/UKSeaMap; survey ID: GB001055. No point records, no non-conflicting modelled data.	MESH/UKSeaMap;
Subtidal coarse sediment	Point and polygon data from a range of sources. The MESH confidence score is 79. 2 point overlap the polygon data. The habitat covers more than 50% of the rMCZ.	MESH/UKSeaMap and Regional project data -BS.
Subtidal sand	Point and polygon data from a range of sources. MESH confidence score 79. 6 overlapping points. Does not cover more than 50% of the rMCZ.	MESH/UKSeaMap and Regional project data -BS
Native Oyster <i>Ostrea edulis</i> beds.	No survey	No survey
<i>Ostrea edulis</i> .	One point record from MB0102; survey ID:	MB0102

MRMLN00300000003
