

## Tarn Point (RRA K) Evidence Review

Region	Irish Sea Conservation Zones	
Site Name/number	Tarn Point rRA ISCZK	
ENG Features present and proposed for inclusion within MCZ designation	BSH	<ul style="list-style-type: none"> <li>• Intertidal biogenic reefs</li> <li>• High energy infralittoral rock.</li> </ul>
	Habitat FOCI	<ul style="list-style-type: none"> <li>• Blue Mussel beds (including intertidal beds on mixed and sandy sediments)</li> <li>• Honeycomb worm <i>Sabellaria alveolata</i> reefs.</li> </ul>
	Species FOCI	-
ENG Features present but not proposed for inclusion within MCZ designation	BSH	<ul style="list-style-type: none"> <li>• Intertidal sand and muddy sand</li> <li>• Subtidal sand.</li> </ul>
	Habitat FOCI	<ul style="list-style-type: none"> <li>• Subtidal sands and gravels.</li> </ul>
	Species FOCI	-
Non-ENG Features (Geological/geomorphological)		-

### Evidence Summary – data provided by Regional MCZ Projects

Feature	Evidence Summary	Key Sources
Intertidal biogenic reefs	Polygon data from MB0102 (I.D. GB000286) and MESH (I.D. GB000286) and four survey datapoints from MESH (Survey I.D. JNCCMNCR10000420 and JNCCMNCR10004138).	MESH, MB0102
High energy infralittoral rock	The presence of this broadscale habitat is based on predictive modelling from MESH (I.D. GB001055)	MESH
Blue Mussel beds (including intertidal beds on mixed and sandy sediments)	One datapoint referenced in 1 X MB102 (Survey I.D JNCCMNCR10000020) and 1 x MESH (Survey I.D. JNCCMNCR10000420).	MB0102, MESH
Honeycomb worm <i>Sabellaria alveolata</i> reefs	Multiple polygons from project MB0102 (I.D GB 000286 and MPALAYERS000253) and single polygon from MESH (I.D. also GB000286), three datapoints from MES/project MB0102	MB0102

### Description of New Evidence Identified by MB0116 project

No new evidence identified

### Evidence That Could Not Be Acquired by MB0116 project

No new evidence identified
